

IAP-SEMINAR

EINLADUNG

Termin: **Dienstag, 10.1.2012 um 16:00 Uhr**

Ort: **Technische Universität Wien,
Institut für Angewandte Physik,
Seminarraum 134A, Turm B (gelbe Leitfarbe), 5. OG
1040 Wien, Wiedner Hauptstraße 8-10**

Vortragender: **Dr. Gerhard Lakits**
Energy Management Applications / Siemens AG Austria

Thema: **Resource Optimization and Scheduling of Generation in Electricity
Energy Markets**

Kurzfassung

Whereas everyone is talking about smart grids, bulk generation remains the main source of electricity for the next decades.

It is subject to new challenges due to the increasing impact of renewable generation (wind power, solar power,..) and uncertainties in fuel prices and supply.

The providers of bulk generation are offering to the electricity market and using mathematical optimization to improve their position on the markets.

The author will give a short overview on todays energy markets and present a state-of-the-art tool set for optimization.

*Alle interessierten Kolleginnen und Kollegen sind zu diesem Seminar
(45 min mit anschließender gemeinsamer Diskussion) herzlich eingeladen.*

*F. Aumayr e.h.
(Seminar-Chairperson)*

*H. Störi e.h.
(LVA-Leiter)*
